

# LABORATORY OR PILOT STIRRERS

RIGAL BENNETT range of laboratory mixers are simply designed for bench use, and can be mounted on stainless steel stand with adjustable clamps. A range of agitators are available and all contact parts are 316 grade stainless steel.

## PRINCIPAL APPLICATIONS

*Chemical, food, beverages, paint, ink and colour industries.*

- We offer a range of single or variable speed mixers.
- Our mixers are designed for clamp mounting and are supplied with stainless steel stand.
- The range of heads should cover most requirements.
- They are designed to have interchangeable head, i.e. propeller, turbine, sawtooth or shearhead.
- They can be used in most vessels.
- We are able to supply motor to suit your working environment.
- Light constructions for portability.
- Can be adapted for permanent fixing.

Please read the table below showing our standard range of mixers. We are able to quote to supply one off specials to suit our customers' individual requirements.

TYPES					KW	SPEED	RPM	PHASE
S/head	Sawtooth	Combi	Prop	Turbine
