## HIRE TERMS

### ADVANTAGES

A quick decision on capital expenditure is not possible.  
There is a delay before new equipment is delivered  
Maintenance shut-down is required but no standby is available.  
New product trial runs are required.  
Capital expenditure can be spread  
Breakdowns require emergency action.

### CHARGES

The charge for the hire is 10% of the purchase price per month or part thereof.  
All items are supplied on hire with option to purchase basis.  
If purchase is agreed in the first month period, the hire charge will be credited against the purchase price.  
If purchase is made after the first month period, we will retain one third of all hire charges and credit two-thirds against the purchase price.  
Transport charges in each direction are to be paid by the hirer.  
A minimum hire charge for the first period is £250.  
Insurance during the period of hire is the responsibility of the hirer.

### CONDITIONS

Returned equipment must be in the condition in which it was supplied - mechanically, and clear of all chemical contamination.  
Any mechanical damage or cleaning will be charged to the hirer.
