USED EQUIPMENT

STOCK INDEX. ((LISIT) EACH e.g. Vertical Mixers, Reactors, Stirrers etc.

Can you possibly afford not to buy used equipment?

Can you afford to wait for new equipment to be manufactured and delivered?

Has your project just been put on hold because you cannot meet your budget?

Have you just realized that your production line is in need of a piece of machinery you did expect to need and worst of all you haven't budgeted for it?

Remember if you purchase used equipment you will save up to 30% and on some occasions up to 70% of the price you will pay for new equipment.

Do you have an emergency break down? Have you been quoted days or even weeks for delivery?

!!!Why don't you see whether there is any way we can help you with used machinery and we will get you back into production in hours !!!

HOW TO BUY USED EQUIPMENT

WE SELL AS-IS

Ready for despatch today.

WE SELL IN GOOD WORKING CONDITION

We offer to sell our used equipment in as inspected condition, or for a higher price we offer a service to supply our used equipment in good working order. We have a staff of trained engineers able to refurbish, modify and rebuild our machinery to meet your needs for use today. We are able to offer to modify our machinery at your request to meet your companies standards and give you the option to incorporate modern computer PLC technology at an extra cost.

ASK FOR DETAILS OF OUR NINE POINT SERVICE INSPECTION PLAN FOR USED EQUIPMENT SUPPLIED IN GOOD WORKING CONDITION.

OR

Rigal Bennett Group offers the following Nine-Point Inspection Plan.

- (1) Strip down machine.
- (2) Clean all parts evaluation report.
- (3) Replace or service items as required.
- (4) Electrically test motors for resistance and earth bench run under no load.
- (5) Check all moving parts for serviceability repair or replace as required.
- (6) Make any special checks to meet customer's requirements and offer to modify as required.
- (7) Paint all mild steel undercoat and gloss coat finish. Specialist coatings can be supplied at extra cost.
- (8) Carry out final checks on machinery, dry run under no load, spark test and hydraulic inspection. etc. (Independent inspections can be arranged if required).
- (9) Prepare for dispatch prices quoted are ex-works shipment can be arranged at cost.

The above scheme is backed up with documented worksheet reports and appropriate internal certification.

We are proud to offer a responsive service to meet our customers' needs which sets us apart from most of the competition and establishes Rigal Bennett Group as one of the world leaders in the supply of quality used process plant and machinery.

We suggest that if one of our machines is 70% right for you, you should ask us if we can modify to supply the machine 100% right and to become the machine you are looking to purchase.

Please contact our team of sales staff who are ready to assist and keen to offer the personal touch when handling your enquiries on the telephone. Or contact us direct from our enquiry e-mail after reading our catalogues within this web site.

WE SELL AS-IS

When you purchase as inspected a saving will be made from purchasing the same machine in good working condition. Plus you are able to take delivery of the unit as soon as it has been paid for.

Be careful when purchasing as inspected equipment that you are competent to inspect the machinery properly before purchase and that you have a maintenance department at your disposal if required.

Please send us your enquiry by filling in our enquiry form to contact us by E- Mail or Telephone.

HOW TO SELL

WE OFFER TO PURCHASE YOUR REDUNDANT EQUIPMENT.

DON'T MAKE THE GREAT MISTAKE. *Read this article.*

It is too easy sometimes to keep redundant equipment that might come in useful some day. So you put it outside in a corner of your yard for years to rot. Then this nasty heap of rotting machinery, which at the time it was placed in the corner was worth recycling, is beyond recovery and has to go out as just another heap of scrap. An even worse case scenario is that the equipment was relatively new when found to be redundant and not written off and therefore less embarrassing to keep it on stock than to show a book loss.

Either way, it is not difficult to see that the decisions are wrong.

Make your assets work for you!

Sell what you have while it is still valuable and buy what you want when you need it.

Can it be possible that you have a yard full of surplus equipment and yet no stand by on which your plant can depend?

Ask Rigal Bennett Group to purchase your surplus plant? Turn your assets into cash.

Ask us to sell your surplus equipment too big to move. We will sell as your agent.

Please send us details of your surplus plant and machinery by e-mail or telephone.
